

Thank you for purchasing an MSD High Performance Air Filter. With proper care and maintenance this filter will last forever. Your Air Filter is made of synthetic fibers that can be washed with common household detergents and does NOT require oiling.

To wash your filter:

- Use a non-petroleum cleaner such as Simple Green®.
- Spray the cleaner on the filter's outer side and allow it to soak.
- Rinse the filter from the inside out with a garden hose.
- Repeat until no suds are visible.
- Let the filter air dry before reinstalling in the vehicle.
- Never use high water or air pressure to clean the filter.

MSD offers a complete line of Ignitions, Coils, Distributors, Spark Plug Wires, Alternators and Starters for hot rods to race cars. Visit msdperformance.com to learn more about these and other performance products for your ride.
